

### **Aims**

The *Seminario Matematico* is a society of members of mathematics-related departments of the University and the Politecnico in Turin. Its scope is to promote study and research in all fields of mathematics and its applications, and to contribute to the diffusion of mathematical culture.

The *Rendiconti* is the official journal of the Seminario Matematico. It publishes papers and invited lectures. Papers should provide original contributions to research, while invited lectures will have a tutorial or overview character. Other information and the contents of recent issues are available at <http://seminariomatematico.dm.unito.it/rendiconti/>

### **Instructions to Authors**

Authors should submit an electronic copy (preferably in the journal's style, see below) via

e-mail: `rend_sem_mat@unito.it`

English is the preferred language, but papers in Italian or French may also be submitted. The paper should incorporate the name and affiliation of each author, postal and e-mail addresses, a brief abstract, and MSC classification numbers. Authors should inform the executive editor as soon as possible in the event of any change of address.

The final decision concerning acceptance of a paper is taken by the editorial board, based upon the evaluation of an external referee. Papers are typically processed within two weeks of arrival, and referees are asked to pass on their reports within two months.

Authors should prepare their manuscripts in L<sup>A</sup>T<sub>E</sub>X, with a separate B<sub>I</sub>B<sub>T</sub>E<sub>X</sub> file whenever possible. To avoid delays in publication, it is essential to provide a L<sup>A</sup>T<sub>E</sub>X version once a paper has been accepted. The appropriate style file and instructions can be downloaded from the journal's website. The editorial board reserves the right to refuse publication if the file does not meet these requirements.

Reprints are not normally offered.

# RENDICONTI DEL SEMINARIO MATEMATICO-UNIVERSITÀ E POLITECNICO DI TORINO

---

*Università e Politecnico di Torino*

## CONTENTS

Edoardo Ballico, On the cactus rank of embedded varieties with generically nice osculating spaces . . . . .	5
H. Argüz and T. Prince, A Note on Schoen’s Calabi–Yau Threefolds . . . . .	15
Peter Danchev, A Characterization of Weakly Tripotent Rings . . . . .	21
M. AIT HAMMOU and B. LAHMI , Weak solutions for a quasilinear elliptic equation involving the $p(x)$ -Laplacian . . . . .	33
Adara M. Blaga, Antonella Nannicini , Harmonic metallic structures . . . . .	43
D. Mucci L. Nicolodi, Ericksen’s type inequalities for constrained Q-tensor models of nematic liquid crystals . . . . .	59
