Aims

The *Seminario Matematico* is a society of members of mathematics-related departments of the University and the Politecnico in Turin. Its scope is to promote study and research in all fields of mathematics and its applications, and to contribute to the diffusion of mathematical culture.

The *Rendiconti* is the official journal of the Seminario Matematico. It publishes papers and invited lectures. Papers should provide original contributions to research, while invited lectures will have a tutorial or overview character. Other information and the contents of recent issues are available at `http://seminariomatematico.dm.unito.it/rendiconti/`

Instructions to Authors

Authors should submit an electronic copy (preferably in the journal's style, see below) via

e-mail: `rend_sem_mat@unito.it`

English is the preferred language, but papers in Italian or French may also be submitted. The paper should incorporate the name and affiliation of each author, postal and e-mail addresses, a brief abstract, and MSC classification numbers. Authors should inform the executive editor as soon as possible in the event of any change of address.

The final decision concerning acceptance of a paper is taken by the editorial board, based upon the evaluation of an external referee. Papers are typically processed within two weeks of arrival, and referees are asked to pass on their reports within two months.

Authors should prepare their manuscripts in LaTeX, with a separate BibTeX file whenever possible. To avoid delays in publication, it is essential to provide a LaTeX version once a paper has been accepted. The appropriate style file and instructions can be downloaded from the journal's website. The editorial board reserves the right to refuse publication if the file does not meet these requirements.

Reprints are not normally offered.

RENDICONTI DEL SEMINARIO MATEMATICO-UNIVERSITÀ E POLITECNICO DI TORINO

Università e Politecnico di Torino

CONTENTS

B. Senoussi, Triharmonic curves in Bianchi-Cartan-Vranceanu spaces 5
M. Imran Bhat, N. Hosseinzadeh and Ahmad M. Alghamdi, Some properties of zero-divisor graph of annihilators of a commutative ring 15
E. Luciano - E. Scalambro, Gino Fano's late investigations on Fano-Enriques threefolds 23
M. Lodi - M. Sbaraglia - S. Martini, Programmare per imparare la crittografia al Liceo Matematico 49
P. Morando - S.M.C. Pagani, Errori di trasmissione: Un bit per trovarli, tre bit per incatenarli (correggendoli) 83
Alexander Saltuari, Didattica della Crittografia e rilettura consapevole delle competenze scolastiche 99
E. Bellini, A. Hambitzer, M. Rossi, A survey on machine learning applied to symmetric cryptanalysis 107
